Home of the Arrangements for the World's Fair Buildings—An Alleged Dead Man Turns Up Alive at Baltimore—An Atlanta Girl Spends Her Vacation in Search of a Father.

CHICAGO, Ill., Sept. 12.—Messrs. Chalmers, Allerton, Higginbotham and Kirkham, of the Board of Directors of the World's Fair, who are to go to Washington, will take with them a set of plans which may be construed as defining the intentions of the directors with regard to the building of the lake front. Their object in going to Washington will be to see the Secretary of War and obtain from him permission to fill in ten acres of the harbor. In a general way it may be stated that the lake front buildings are to be the Federal building, an electrical exhibit, a building for arts, a memorial hall, which will also be a hall for paintings; an annex building for the same purpose, a building for industries of a marked artistic character, a building for administrative purposes to be used alike by the World's Fair people, the State of Illinois and the State of Illinois headquarters.

Wm. Thiele, a grain dealer, confessed to Justice White that he had used a cruel method he employed to cheat the Chicago, Milwaukee and St. Paul Railroad. Thiele received his grain from the St. Paul cars, and every morning his wagon was weighed before he got a load and that weight was deducted after the grain was loaded and weighed. The wagon was not empty every morning, however. Mr. Thiele knew the value of boys, and every time he went to get a load of grain he carried a boy along with him in the wagon and both wagon and boy were weighed together, and Mr. Thiele got credit for the weight of both. The boy every time he got a load and the average weight of the loads was about 120 pounds. For this Thiele was arrested.
